Even if you do not wish for your child to receive the vaccine, it is still important that you complete the online form so we can record your decision.

### The Nasal Flu Vaccine

The nasal flu vaccine:

- Protects your child from flu
- Helps protect family members and others, especially elderly relatives, young babies, and those with serious health conditions
- Is free, painless, quick, and effective at reducing the spread of flu

We also offer the flu vaccine as an injection, which is gelatine-free, for children who are unable to have the nasal spray.

If you have any questions, please do not hesitate to contact us.

Kind regards,
